"Worthily to love, and fondly to devote ourelves to the happiness of another, who deserves our high regard, is not condemned by religion. It s not even a weakness which it permits and denands. And the heart that is deceived or betrayed, need not augment its anguish by self-reproach--Love is not only an innocent but a noble passion. When guided and controlled by religion, it is the germ of all social virtues—the cement and the solace of the virtuous relations of human life.-When rewarded with the hallowed possession of its object, it strews the path of duty with flowers, and scents the air with fragrance; when unfortunate, and ill-requited, it becomes absorbed in high and holy principles-investing resignation with unwonted sublimity, and extracting from earthly disappointment, the calm satisfaction of heavenly hope. The process by which it is thus transformed, may mpair the fragile tenement in which it is enshrin ed, and the dross of mortality, in such a furnace, may melt away into its kindred earth : but the soar ing, unrobed spirit, returns to Gon who gave it, and at last enjoys repose where it first derived ex-

In short, I question whether there is any of the phraser, however apparently ridiculous, or unmeaning, that would not, upon investigation, be found connected with some circumstance with which it would be useful, or at least curious to be acquainted.

Among a variety which might be instanced, few of these adages, will, perhaps, at first view, appear more unmeaning than that of returning to the old trude of bashet-making. Yet this, perhaps, will be admitted to have derived its origin from the traditions of a humble kind of excellence, to which the empire of Britain once owed a part of its reputation, and to bear, in fact, no other interpretation (as its general application, indeed, would lead one to conclude) than that of sliding back into old habits, or returning to primitive occupations of more ignorant periods. In this opinion, I am supported by the historical fact, that the ancient Britons were noted for their ingenuity in making baskets, which they exported in large quantities to the continent, and particularly to

These baskets were of very elegant workman ship, and bore a high price, and are mentioned by Juvenal among the extravagant, expensive furniture of the Roman tables in this time.

Nothing can better prove the very high estima tion in which the bankets of ancient Britons were held by the polite Romans, than their thus laying a claim even to the invention of them.

The following extracts from the third edition a tract entitled, "Sermons to Asses," printed in the year 1769, and dedicated to several Ministers of the Gospel, are well calculated for the present times, and may not prove uninteresting to some of your readers :

" Issuchar is a strong ass, couching down bet two burdens." - Gen. xlix. 4.

"Sermons to disses may appear strange to such as have lately read S-vmons to young women; but they ought to consider that something is even due to asses. We read of the ass-kind preaching to mankind, and why may not men preach to asses? Some grave persons in black will asy, this is an insult to mankind, and a reflection upon gentlemen in holy orders. The author can only say, he has followed the example of the patriarch Jacob, who preached to asses."—From the preface.

To say that the will of God is plain and perfect in all things pertaining to godliness, and yet allege, that it cannot sufficiently direct us into truth and guard against error, unless it is set forth by sometimes and it is set forth by sometimes the set of that are thus required to believe without evidence: Rome has gone far in the practice of absurdatios, but she never required any other foundation but implicit faith to build them upon. What is not manifestly evident from the word of God, to every man that is required to give his assent, can never be an article of bis faith; he may be so complain sant as to believe as the church does, in his words and public confession, but is an infidel at heart not-

"So long as the pure oracles of God were the only creed of the Church, we find her members more simple and sincere, than ever they have been since; but as soon as the doctrine of revelation began to be clothed in a hyman dress, it did not strike the mind with such reverent and godly fear; afterwards men made more free with sin, and began to find church authority for committing it—till at last they could produce indulgences for almost any kind of wickedness."

"It is by means of such trapping as this now mentioned, that the authority of the clergy is supported t for they could not ride without their and dies. Were once the common people to receive nothing as their creed but the Scripture, the clergy would soon have no more authority than what their good services, and good conversation procured them. They would then be obliged to be helpers of the joy of Christians, but should no longer be lorde of their faith. Good men will always respect their teachers, as long as they are examples of goudness, and condescend to men of low degree: but such as understand the New Testament will reject all dominion over their consciences but the lordship of Jesus Christ. When men have not the exercise of private judgment allowed them as their natural privilege, but are marked down as heretice for every deviation from the national creed, they are much in the same situation with the prophet's ass."

FOR THE SATURDAY EVENING POST.

In your last Saturday Evening Post, you pub lished an account of the dissection of a "Coquette's heart." By giving the following an insertion in your paper, you will oblige,

FRANCIS.

DISSECTION OF A BROKEN HEART.

A short time since, a young lady who was pos essed of every virtue that confers dignity and lustre on the female character died. She had long pined under the tortures inflicted by that faithful servant of death, the consumption; and, as mental dejection seemed to have produced her bodily malady, it was concluded to dissect her heart, in order to discover whether it could afford any clue to the mystery which was connected with her illness. Accordingly, a "skilful professor of Anatomy" was engaged to perform the operation, and it was soon discovered that she died of that incurable disease-A BROKEN HEART. The heart was very arid; its juices were dried up by long grief. Although they thus perceived what had been her disease, they feared that the cause of it must ever remain a secret to them. However, they concluded to inspect the core of the heart, and, on narrowly investigating it, they saw the likeness of a young man, who seemed formed for the purpose of fascinating the teuder sex, but in his eye could be discerned a certain expression which told of perfidy and dark deceit. With the aid of a micro scope, the following lines were found punctured on the heart : over them was inscribed Shakspeare's beautiful sentiment.

"Love is not love which altereth.

I am a poor, a broken heart! I rested all my hopes on one, Who in me planted sorrow's dart, And smil'd in joy at what he'd done! I gave him all that heart could give; Deep in my folds his form I wore; For him, alone, I wish'd to live; His image fill'd my inmost core!

More constant heart where could be find? Oh! no -and yet, with soul unkind, For all my love he gave deceit! Oh! when he gain'd this heart, a vow

Of Love was given—'twas softly spoken;
It then was gay—what is it now?
A heart which blighted love has broken!

Yet, oh! my Henry, though thy breast Hath wander'd from the love it vow'd-Though cold in earth I soon shall rest, Wrapp'd in the chill sepulchral shroud,
May Heav'n on thee its blessings pour;
May all life's joys await thee here;
May biss be thine when life is o'er; Of thee I ask but one-one tear!

From this it was too plainly seen what had caused her death, and the by-standers were more than ever convinced, that though a few, a very few faithless women, possessing coquette's hearts, may exist, woman is, in general, a kind and affectionate being, loving with truth and fidelity even when the object of her love is unworth it; and the physician remarked, that he had, in the course of his practice, found many cases of broken-hearted females, from "blighted love,"

COLLECTANEA

PUBLIC EXECUTIONS. Most men take exquisite delight in seeing other people hanged: in all countries, curious and eager multitudes gather and press around the gallows to behold a fellow creature perish for his sins. The following incident, which hap-pened in 1778, in the New Hampshire Grants, now Vermont, illustrates our remark:

pened in 1770, in the new remark:

One David Redding was convicted of treasonable practices, and sentenced to be executed on the 4th of June of that year. The curiosity, which, not much to the honour of human nature, was been manifested on such occasions, was which, not much to the nonour of human nature, has ever been manifested on such occasions, was on this greatly heightened by the fact, that a public execution had never been witnessed in Vermont. To this curiosity was added the strong mont. To this curiosity was added the strong feeling of indignation which such a crime was calculated to excite at that period. Under the influence of these feelings, a vast multitude collected to witness the execution. In the meantime, however, the learned counsel had discovered an important defect in the proceedings.—Redding had been tried by a jury of six only; and it was very unfortunately discovered that this was contrary to the common law of Great Britain, which required the verdict of twelve. Application was immediately made to the Governor and Council for a reprieve until a new trial could be Council for a reprieve until a new trial could be had. The reprieve was granted at the moment the anxious throng were collecting to witness the

Whether is Gin, Rum, or Brandy, the service of Gin, Rum, or Brandy, the service of the defined by hypothetical reasoning a A piece of raw liver was put into a glass of gin, anotherinto a glass of prandy. That in the gin was, in a given time, partially decomposed that in the rum, in the service, not diminished; and that in brandy was quite dissolved. The argument deduced was, that the spirit in which the liver remained unchanged unamely, rum, was the most wholesame. Now differ completely in our opinion; for we know that applied cannot thus affect theing animal matters therefore the stomach casant, ok the piece of liver, is dissolved; and we think that the spirit which decomposed the animal substance—manely, the brandy, is the most wholesome, because it is the most likely to dissolve the animal food in the element — Medical Advisor.

How to enter and has to care a Cold.

How to catch and how to cure a Cold.

After this time of the year colds are cally caught, and difficult to cure. The following will be found effectual:—After a quick walk in the evening, sit in the draft to cool; the consequence will be a severe cold, attended with cough; the next day hourseness, short breath, and much exceptions in the evening, at severe on to a well. next day hoarseness, short breath, and much expectoration: in the evening, at seven, go to a well frequented tavern, and drink three or four glasses of strong punch, or stiff rum and water; stay till eleven, walk home cosey, and go to bed; you need not get up next day, but send for the spothecary; the following day for the physician, and the third day your friends will send for the undertaker. You will never feel the effects of an actumnal cold afterwards.

"No, no," cried the brave old Boileau—"don't hurt the boys; let them break the cabin windows?"

At an English Opera House, last summer, a gentleman fell suddenly in love with a young lady, who sat with her mother and sister a few seats from him; tearing a black leaf out of his pocket-book, he wrote with a pencil, "may I inquire If your affections are engaged?" and handed it to her, which she showed to her mother. Shortly afterwards she wrote underneath his question, "I believe I may venture to say they are not; but why do you ask?" and returned him the paper. believe I may venture to say they are not; but why do you ask?" and returned him the paper.— The gentleman then wrote on another leaf, "I The gentleman then wrote on another leaf, a I love you dearly, I am single, I have 1000£ a year, I am not in deb; I have a good house, and I only want a good wife to make me completely happy; Will you be mine? If you will, I promise, (and with every intention of keeping my word) to be an affectionate, indulgent, and faithful ausband to you, and what more can I say?" The young lady was so much pleased with this declaration, that they immediately became acquainted, and, in about four months afterwards, with the leave of her parents, he led her to the hymenial altar.

FOR THE SATURDAY EVENING POST, AN INTERESTING EPISTLE. MOLLY PRICE TO AUNT BECKEY.

Oh! dear me. Well, why did you not come over and heat oven for 'em at Long Beach this year, and see new house run up alongside Hor nor's old one, with its fore-end right toward broken-hearted females, from "blighted love," but he never knew an instance of it in his own sex; and, he added, "How could heaven permit woman to be as false and faithless as some of her enemics have represented her to be, when it sent her on earth to cheer, to console, and to right at her, just tike the great elephant ane naw round at York, winter a gone. Datter comes home seldom—just to tell us what she hears 'em talk-ing about—the news and them at Shuffleboard's, where she says she stops sometimes, when to at-ing water-pail. They have terrible room now, and a swarm like of boarders from Phildelphy and round. Fayther thinks himself a dab at eyphering and Jarsey law—so datter one time ask'd him, if new house has no celler under it, how can it have two sellers up stairs? phering and Jarsey law—so datter one time ask'd him, If new house has no celler under it, how can it have two sellers up stairs? Passing finger over bald pate three times, he could not tell.—Then how could Laws of Phildelphy break a wine-bottle over new house, and make Castle Payette of it, if its under Laws of Jarsey at same time? He gave up. But when she ask'd him, if Tucker Beach and Long Beach have just fifty boarders a-piece, how then, she said they said at Shuffleboard, could Long Beach have one Moore there?—that fairly stagnated fayther.—Revolution times, he said, altered every thing. We have had our shear of two porpoises, thrown ashore in thorough-fare, and expected to get ten gallons oyl out on 'em, to sell, but fayther says now we only get five gallons and the matter of a pint. Oh! dear me—and the rains has been dreadful, winter a-gone; it come over our and hills like a mill-tail, and t'other datter, that weaves some, and fayther and I, had to watch old chimney by the hour, fearing old fabrick would come down over our heads; and sure enough, and, to mend matters, I broke glass. out of the winter a-gone, and had to keep ninces in and, to mend matters, I broke glass, out of the left eye like of my old iron-rim spectacles, winter a-gone, and had to keep pieces in with a bit of cobler's wax, right in the middle, which makes me look half up-aide-down, when starting for segar stumps on grass-platt, throws away of

Sometimes, just to keep off musquitoes, squeak went cook's fiddle—helter skelter—chairs and tables—dining table down the middle. Then again, at one in the morning, uneasy gentlemen from Castle Fayette, would come down and wake up poor cook and fiddle-string—chusing their own lit segars for partners, danced old Virginney and cowtillions. So harm—all funny and merry. Then regular every morning, by star-light, they heard Cofferdom march—flathe, bathe! Oh! dear me—what heaps of morney the Bay state folks is making. Thinks says I, what would a York shilling, put in a hat, be to spending people? and it would do us so much good, and them no harm. (I mean the boarders.) After all, nothing I covet so much as large round, shining spectacle glasses Landlady has in her silver rim she has on, setting in her cubby like, a-head the bar, where she keeps fox-grape pye and giblets from black sarpents, and the up-beach sheep-headers—if she would truck, I would give her my iron rim and oyle for the odds, if fayther would. Datter says Jacob's boat brought a swarm from your house to discount of the odds, if fayther would. acub's boat brought a swarm from your house o dine down there to dinner; and she heard a rench gentleman tell 'em at Sluffleboard, says e, "Mr. Long Reach, if you have plenty of de hiphends here, at your Reach, we have over at ouse of Mr. Jacobs Willett, de musikers plenty, ne much, and chin for sunder the Aust Hards. house of Mr. Jacobs Willett, de musiketa plenty, too much; and chip-fire smoke put Aunt Beckey's eyes out, only Jenkins bring down Doctor Hove-weet's eye-salve, made of glue and saw-dust, which make 'em in gain, good as ever.' Datter asid, that's right. Fayther had been up at Liberty's (who is dreadful siling) about the cyle, and York prices, and was telling datter that weaves, and I, about a down-right upset out of a skiff, and a Sunday on peaza, where some of our Beach boys out-talked iron-heels gentlemen, and give 'em two, about funny matters, when home comes datter from new house, with mouth open, and full of news. "Pay ther," says she, "Fayette's come round at York, and was to take a French gentleman to Phildelphy to illuminate it with a Coffee House full of Sanderson lamm-sile, to sorch the Governor of to illuminate it with a Coffee House full of derson lamp-oyle, to scorch the Governor at delphy—with a thousand light-horse to walk all on foot round the State House, on a bed spread to Washington, and take Cobwallis down to York-town, with Jefferson and Madison alongside, when he goes into Baltimore, with twenty-four steam boats, all joined together—one hundred and fifty to a square inch," she said. Fayther said she was a fool. But then, fayther thinks and she was a fool. But then, fayther thinks any he, if old La Fayette's come, and they should light up in Phildelphy, who knows what oyle may bring there. He goes over to-morrow, and if they get over without getting on Goose blar, we as to come back, may-be I will go too; and if you should be on the main when I get over, I'll not ful to call, if I am spared, and take a ginger-bread. Of these only 9 are in absolute military command; all receive half pay, and many have governments and pelitical situations to support them.

Very few of the British nobility encounter the hardships of the ocean. Occasionally a younger son gues into the service and comes in time to the family houses, by the death of a brother. But the army is the favorite service of the nobles. A few Scotch Lurds, who are generally needy, are in the navy; though most of the navy Lords are creations. There are 823 Captains, 819 Commanders, 3708 Lieutenants and 553 Masters.—Probably they have 500 sail of sea-worthy vessels. Of these, perhaps 100 sail of good ships of the

In England there are 19 dukes, 16 marquesses, 305 sards, 24 viscounts, and 145 barons, making a total of 304 peers of Great Britain. To these must be added the 16 elective peers of Bentland, and 28 for Ireland, and 9 persages which are at present held by females, and it gives a total of 357; the whole manher of which the House of Lords can consist, without new creations. The English nobility is the least ancient of any in Europe, though some few families are of great antiquity. It is entirely owing to the fact of their nobles blending so easily with the commons of their empire, that the aristocracy of their government is not only tolerable, but, for their purposee, admirable. ser, admirable.

The oldest peerage in the British empire is the Barldom of Stutherland, which dates from the year 1666. LATE FROM ENGLAND.

THE KING OF PRANCE DEAD.—By the old line packet ship James Cropper, Capt. Marshall, arrived at New York, in 27 days from Liverpool, the Editor of the National Advocate has received his regular files of the London papers to the 14th.
Louis the 18th King of Prance, is dead. Europe has been long prepared for this event. The London Crarier of the 13th, represented him to be at the last extremity; so swelled and feeble, and broken down, as to afford no hopes of recovery.

Louis the 18th was a well read gentleman, of a good disposition, and free from many of those vices which unfortunately distinguish kings. He has seen much trouble, and could have had but little pleasure since his restoration. He was a widower, and has left no legitimate children. He will be succeeded by his brusher, the Count d'Artois, under the title of Charles X. The new king mounts the throne at a good age, as he cannot be less than 65 years of age. He is a rigid monarchist, and a bigor in religion; and the clergy will rejoice on his coming to the throne. His health, however, is good. The next in succession is the Duke d'Angouleme, who married the daughter of the unfortunate Louis 14th. married the daughter of the unfortunate Lou

It was understood that Lord Cochrane would return to England in January.

Mary Williams, a widow, and "a respectable looking woman," was lately convicted by a jury in England, of horse stedling. As soon as she heard the verdict, she fell into hysterics, and at length awoomed in the arms of the jailer, exclaiming "My children, my children!" On her recovery, she was informed by the Court that her life would be spared, and that she would be recommended to the Court for the extension of such mercy as the the Crown for the extension of such mercy as the circumstances of the case would admit.

FROM SOUTH AMERICA.

By an arrival at this port from Santa Martha, intelligence has been received from Bogota, giving an account of a decisive action fought in Peru, between Bolivar and the royalists, in which the latter were entirely defeated. The Colombian general, Cordova, was killed. Thus ends the war, and commences the freedom of Peru, achieved by the per-severing bravery of the most gallant and most dis-interested man known in modern times—the true patriot, Simon Bolivar.

Colonel Lima, first aid-de-camp of Gen. Paez, who eame passenger in the Colombian brig of war Pichincha, Capt. J. 8. Maitland, has politely furnished the following intelligence from Peru. On his arrival at Porto Bello, on the 30th August last, he found official accounts had been received at Panama from upper Peru, stating that General Bolivar, in consequence of a misunderstanding that existed between the Royalist Generals Carratela and Olaneta, put himself in march erals Carratela and Olaneta, put himself in marc erate Carrateta and Chanceta, put tumnett in march from Trujillo, to attack Canterac, who was then at Pasco. Canterac retreated to the atrong entrenchment of Jauja, in Upper Peru, and fortified himself there: but General Bolivar, after having blockseled Callao, and left in Lima the batallion of Zulia, two squadrons of Cavairy, and the guerillas of the country, pursued Canterac, and forced him from his entrenchments. Canterac again rehim from his entrenchments. Canteruc again re-treated precipitately into the interior, leaving some prisoners, who declare that he had no more than 6000 men; while Bolivar's army consists of 16,000, of which 10,000 were Columbians; with 14 0.00, of which 10,000 were Columbians; with which force Bolivar was pursuing him. The prisoners were sent to Guayaquil, and from thence to Panima, in the corvette Santander, which arrived at P.nama on the 9th August; and they were at the time of Colonel's Lima's departure, confined in the castle of Chagres. Among them were four Spanish colonels, and a number of subaltern officers of various ranks,

American Surgery.—For the first time in America, the operation of taking off the thigh at the hip joint, was performed lately at the New York Hospital, by Valentine Mott, the Professor of Surgery in the College of Physicians and Surgeons. The patient, says the American, was a boy of about twelve years of age, labouring under a case of necrosis, or decay of the thigh bone. The operation was completely successful—and was endured by the little patient with great fortitude. His symptoms since, have, as we are informed, been of the most favorable kind; and if he survives, as we hope he will, this great and he survives, as we hope he will, this great and dangerous, but in his case unavoidable experi-ment, will confer renewed honor on the already distinguished operator, and add to the renown of the profession in this country.

General Barton.—There appeared some time since, a paragraph from a Harrford paper, stating that this officer of the Revolution, was languishing in a prison in Vermont, for debts which poverty prevented his cancelling. It is, now said, that Gen Barton has no just claim upon the government or the state—that he has all along had the means of extricating himself from his confinement, if he had been so disposed—that he held a lucrative office in the Custom House, until his detention in Vermont, and that his son occupies the same place—that his and that his son occupies the same place—that his family are in easy circumstances, and that his ab sence in Verment is a voluntary act on his part.

The performances at the Theatre on Monday commenced with Shakspeare's tragedy of Obello. Othello appeared in a military cocket hat, Russian boots, and something over his shoulders more resembling a Roman toga than any other theatrical apparel which I can liken to it. The Senators all wore large helmett and sandalo—Cassio appears to be drinking with a mized company in a tavern, when I ago enters and sings a song, the subject of which is that Englishmen can never fight till they have eaten roast beef and drank sufficient to make them insensible of what they are doing. Iago and Cassio then danced a mock minuct, when Cassio sang a song, and the other characters joined in chorus. In the fight which took place between Cassio and Roderigo, the seat of the latter was pierced first by Cassio and then by Iago. Boderigo, after shout half a dozen somersets, (after the style of Grimaldia), tumbled down at the back of the stage. A wheelbarrow was then brought on the stage, guarded by a file of soldiers, into which were placed both Cassio and Roderigo, and wheeled off. Othello smothered Desdemona with a pillow at least six feet in length. Emilia then came running in, pursued by be russhand with a naked sword in his hand, who aiming band with a naked aword in his nand, who aimself at his wife, struck Othello, and both immediate by fell to fighting, when lago was mortally wound ed, and drove off in the same barrow which con wayed Gassio and Roderigo. quainted with Mr. M. T. C. Gould, a gentleman of celebrity as a Stenographer, at present in this city, giving lessons in the art of Short-Hand writing, at the Shakspeare Buildings. From our knowledge of his system, we have no doubt those gentleme who wish to acquire a practical acquaintance with Short Hand, so useful in many cases, have at present a better opportunity of doing so, than may shortly occur again.

The election in this city and county, on Tuesday, was conducted, excepting in one instance, with most propriety than has heretofore marked the proceed ings on like occasions. John Wurts, Esq. is elect ed to represent the first congressional district-Joseph Hemphill, Esq for the second district-and crats have el eted Conrad Wile, county commis sioner, and Benjamin S. Binsall, auditor, by large majorities. James A. Mahany G orge N Baker, Bobert O'Neil, David Snyder, Jonathan T. Kuight. Joseph Starne, and J. el B. Sutherland, are elected to represent the county of Philadelphia in the state legislature. The federalists have elected six members of Assembly, five members of the Select Coun ail and 19 members of the Common Council. Mr S. E. Weir, on the democratic council ticket, has succeeded by a small majority over S. J. Robbins, one of the federal candidates.

A work, promising much usefulness to the hisorian and politician, is about to be commenced in Washington city, under the auspices of Messrs Gales & Seaton. It is to be entitled, " A Register of Debates in Congress," intended to comprehend a more full Report of Speeches on topics of general interest than has ever before been published, or than can possibly be given through the ordinary and limited channel of a newspaper. This compilation will be printed with great regard to accu racy, and will be confined to an octavo sized page; about five hundred of which will constitute the first volume. It is to be commenced as soon in the next session, as there may be materials for one form of eight pages : these will be transmit ted to subscribers in distant parts of the union, as they are published, or they will be kept in the publication office until the volume is completed, for the reasonable price of three dollars, to b paid in advance. "Every one who takes an interest in our political history, (says the publishers) as well as all those who engage in the duties of political life, must have felt and lamented the want of a Record of Debates in Congress, in a convenient form, with indexes which might lead the inquirer to any subject debated, and to the name of any one who was engaged in debate. Such a work would be an elementary book for young politicians, and we have no hesitation in asserting, that the possession of such a one, from the commencement of the existing government to this day, would be of immense value to the nation, were it saly to show what has heretofore been said upon praise than the former labours of the prolific tions which are continually recurring for dision, and producing needless consumption of erfluous debate. What is true of the procettes have past, will, as soon as they are "Gretna Green," and the "Indian Fig," be a least of those is which we live." selections, and neither possessing autraordin

the citizens of Philadelphia, in behalf of those youth of the metropolis and its districts, who are suffered to roam vagrant, neglected and uneducated while so many avenues to instruction and improve ment are kept open for their benefit. The controllers of the public schools ask for assistance in the discharge of those duties necessary to advance the purposes of the Institution. Many of the evil habits which are found growing on society, have been imbibed in early years, when the mind was rithout the light of wholesome instruction to check their noxious growth. It is desirous that such a plan should be adopted as will draw the rising generation, more generally, out of the paths of error and strife, into which many of them are ever heedlessly running. It is a proud reflection to know that upwards of twelve thousand children have received the benefits of the institution, since its establishment five years ago, and yet how much greater might have been this number, had those little thoughtless fellows, who are suffered to idle and dissipate their time in all manner of ways, in our streets, been called from their folly, and shown how much better it is to cultivate the mind: to read a carn arithmetic and geogra-phy—that when the opportunity arrives, they may not be wanting in the common rudiments of education to commence their fortunes in this theatre of trials and temptations. Those public agents and others whose official duties and charitable services lead them to a frequent intercourse with that class of children most wanting attention, will, it is hoped, contribute much towards ameliorating

The American Monthly Magazine, for October lies open before us, and as we hastily peruse its contents, we shall present our readers with some omments thereupon. When this periodical was first ushered into an existence in the world of letters, we hailed its appearance with cordial satisfaction, and heartily desired that the new-born nfant might speedily attain the vigour of matu rity. A publication of the kind had long been a desideratum, and we felt confident, from our knowledge of Dr. M'Henry's zeal and abilities, that he would speedily establish his claim to the proud national title he assumed for his produc tion, on a firm and immovable basis. The for mer numbers confirmed us in this favourable opi nion, and it is not without serious regret, we feel ourselves obliged to state, that the present is decidedly inferior to its predecessors.

The leading article "An extract from a Mapu cript Novel," written, we presume, by the Editor, contains a discussion on the poetical nerits of Pope and Goldsmith, with which, as the opinions there advanced accorded in a mea sure with our own, we were well pleased. The Doctor, however, has been, in a subsequent part of the Magazine, so severe with Geoffrey Crayon, that we cannot forbear pronouncing the solilotract, exceedingly inelegant from the continual recurrence of such phrazes as "might be," and may be." We do not mean to say that these phrases are in themselves exceptionable; but when they occur in almost every sentence of a paragraph of considerable length, they become highly offensive.

Lights and Shades of By-past Times," b the Author of the Woodlands, is written with that Author's usual elegance of style, and but for a few slight redundancies, is a piece of chaste and nervous composition.

The Absent Man," we shall say nought; as they are so absolutely "dull and uninteresting," we could not read them with any degree of attention.

has, heretofore, been a sprightly, humourous, well-written article, and we are sorry to perceive that, in the present number, it has degenerated into mere vulgarism The delineation of such characters as are drawn by the pen of " E. R." can never afford pleasure to a refined reader, and "the loves of Richard Cudroe and the peerless Phillis Clincker," will call a blush to the cheeks of every delicate female who peruses them. For the future reputation of the Magazine, it is to be hoped "E. K." will employ his prowess upon better subjects, or should he not, that his effusions will obtain no place in an American periodical.

"Little Dominick," from Edgeworth's Essay on Irish Bulls has so frequently gone the rounds that, notwithstanding its excellence, but little instruction or amusement can at this time be derived from it, and its insertion in a work professedly original, is truly surprising.

The "Review of Tales of a Traveller," is more infavourable than any we have hitherto seen, condemning, without reserve, the whole three parts as "trifling," and denouncing several of the Tales as " absolutely silly, fit only to amuse children, and but for their length, admirably calculated for the pages of two-penny primers." This displays too much of that critical acumen, for which the learned Doctor, when canvassing the merits of his compeers, is notorious; and we fear he has been influenced in this sweeping Review, as much by the feelings of literary rivalship, as by the dictates of unbiassed and impartial eriticism. The Tales are certainly less worthy of writer who produced them, but deserve rather better treatment than they have received at the

interest, close the prose department, when an Elegy, in Imitation of Gray's, by Dr. M'Henry, of which we cannot speak in terms of commendation, meets our view, and brings us to an edi torial account of La Fayette's arrival in Philadelphia, which concludes the number. The circulation of this periodical is already

extensive, and is, we believe, rapidly increasing This circumstance, connected with the reputation of the Editor, induces a supposition among many that it affords a fair specimen of our national abilities, and on this account, the strictest discrimination ought to be used, by the gentleman who conducts it, in the selection of matter for its pages. The lucubrations of every Tyro who may choose to exert what his fond friends have taught him to believe are talents, for the benefit of the public, should not be admitted-nor can we believe that tedious descriptions of scenery familiar to every inhabitant of our city, will at all enhance the value of the work. When the Reviewer takes up a book for the purpose of criticising its contents, he should permit no feelings of prejudice to warp his judgment-no matters of pique to influence his decision; but, discard ing all private sentiments, he is bound carefully to examine and well to weigh his opinions, ere he gives them to the world, under the sanction of an imposing name; lest the minds of the ignorant be misled, and the praise due to an Auhor be denied him. No man has more fully experienced the truth of this principle, than the Editor of whom we are now speaking, and it is really a matter of surprise, that, after the severe inflictions he has received from the lash of incensed critics, he deals so uncharitably with the polite Geoffrey Crayon, who has often delighted, with his exquisite productions, the reading com munity. We trust that, hereafter, the Magazine will be less liable to the censure we have felt it our duty to bestow on the number before us, and we shall be gratified if the next affords us an opportunity of lauding it with unqualified ap-

Mr. LUIGI PERSIÇO has just completed a coossal bust of our adored LA FAYETTE, which lossal bust of our adored LA FAYETTE, which for its resemblance, spirit and classic expression, must be regarded as one of the most happy efforts of art. It is the same which adorned the saloon of the Washington Hall, at the French Dinner, where it was confronted with the distinguished original.

A Demonstration of Natural Philosophy.

There is a man travelling in England, and exhibiting in one cage, a dog, a cat, a mouse, and a sparrow; they live together like brothers and sisters. These four animals sleep in the same bed, and eat at the same dish, the dog indeed serves himself first, but does not forget the cat, who has the complainance to give to the mouse certain tid bits to his taste, and to leave to the sparrow the crumbs of bread, which the others do not envy him. The dog licks the cat, the cat combs the dog, the mouse plays with the

paw, and the sparrow flutters high and low, pocking sometimes one and sometimes snother. This man with his cage may he very properly designated by the appellation given him at the head of this article. He proves that the dog and cat are not belligerents by instinct, but by prejudice and practice. But, again, he proves, that if these animals are by nature belligerents, their antipathies may be removed by making them better acquainted with each other. What an ocean of blood—how many millions of lives—how many fair cities, might be saved to the world every century, by the world's taking a leason from this Philosopher, and shutting its belligerent inhabitants up in cages till they become better acquainted with one another. We are enemies only because we are strangers.

To Gibbs and Fortune.

And now right plainly are;
The wondering people no more seoff,
For GIBBS is well to thee!
Phetus was g. communat—and Erato
Show diless of sterness than old Platof
When Hymen joined you, hand in hand,
Ceres was near, her stores bestowing;
Pomona had the pregnant land,
With richness and with grain be glowing!
Robigus gave his corn, nor feared
That GIBBS his treasure fairly shared.

GOOD TILLAGE.

Gracinus, in his book concerning vines, relates that he often heard his father tell of a certain Parisins, who had two daughters, and a facen plated with vines. Of this farm he gave one third part as a marriage pursion, to the man who wedded his about a concerning protocolor, to the man who wedded his about a concerning the reserved to himself. Afterwards, on the marriage of the younger daughter, he gave away the half of the remaining land, and found his income still he no respect diminished. What concludes he from this? But that the rhird part of the tarm was at length better cultivated than the whole used to be before. GOOD TILL VGE.

The pleasures and advantages of agricultural pursuits are perhaps so well understood as to exclude the propriety of any remarks on its utility; and to those engaged in the employment, it may pass of as a uncless enterprise, interior to their mustedge and designethenion of the subject 1 yet we labeled the thought, however ineffectual the design may prove for correcting and emproving the provision of farming, that the pleasures incidental to this avocation may be increased by description, and may be an interesting and much more consistent pith rational improvement, than the ideal forms of faction or the deceptive colorings of novelty.—What was affect greater compass for description, or a subject theme for the range of the imagination, that the heariles of the landscape, or the case and conflict of agricultural prosperity? What can engage the attention of the great body of the community of choice welly as a description of things to which their diady employments are directed? The causes are the assess in this as in the mechanical or professional pressuits; and thus, wholever exhibits an improvement, unfields an increase of wealth to ambitten, or occount the greater and enterprise is embraced with case of the property of the enterprise is contracted with case of the property of the enterprise is an improvement, unfields an increase of exception of the enterprise is
